

DaVinciAudio Labs®

## In UniSon MK II Turntable

Clear design, elegant rendition and styled to impress This classic beauty uses same physical principles of the cutting machine and cutting stylus.

*Experience one of best sounding turntable available in the world today*

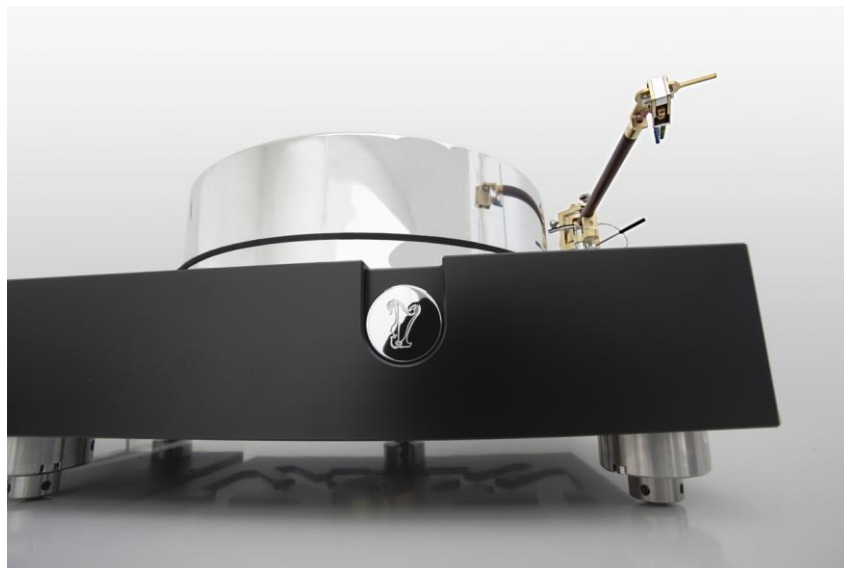

Dimension total 61,5cm x 38cm

The requirements are:

- carefully selected materials
- Swiss precision technology for top Swiss quality
- a highly stable base
- to eliminate resonances we fill the cutout with special compound
- completely silent magnetic bearings
- an absolutely stable power supply
- platter with integrated damping system
- height adjustable damping feet developed by DaVinciAudio
- A second tone arm base, and other colours available on request.

weight approx. 73kg

These form together the cornerstone of the DaVinciAudio Labs “In UniSon” MK II turntable concept aimed at a replay system matching, as closely as possible the requirements of a perfect record cutting machine. You will love it!
